MESSAGE FROM THE EDITOR

Hello dear readers!

Desert Eagles and Cuban Liberation Organisation, the bitterest enemies to have ever lived on SAES:RPG. Being military and foreign capitalist dictators respectively, both have made deep scars on our economy, our social law and our history. Wednesday 22nd August, Desert Eagles went a bit closer to being the true military we deserve, and that we need. DE signs a contract with SANA, making myself the "War Correspondent", keeping the deal in place. They provide us with transportation, shelter, protection and really close access to the

Desert Eagles, in exchange of letting the general public know of Desert Eagle activities. We intend on using this as a great opportunity to get on with serious work for now, let's see how stuff goes.

Global Trust Finds Uranium Under Mt. Chilliad

This uranium will ensure after the processing in the Chemical Plant in Flint Country (soon a preparation plant) to fuel rods and the delivery to the nuclear power plant at the Sherman dam which is still in build that the energy will never dry up!

The CEO of Global Trust said in an interview that this step will reduce the costs of this ressource by 47% because it was planned to import fuel rods over the sea way to San Andreas. But that is not needed anymore after this discovery.

Global Trust Caught Spying on Eden Initiative

It has emerged that GT has been spying on its main rival, The Eden Initiative. The case first emerged after a routine traffic stop by The Strike Team in San Fierro revealed a stolen laptop belonging to The Eden Initiative. This resulted in the questioning of the driver and the eventual acquisition of a search warrant for all GT properties. The press report released by The Strike Team revealed that a camera containing photos of EI employees as well as security features on the EI headquarters and access point on the roof. Also found were building plans showing more detailed views of interior security. The Strike Team continued to search EI properties finding a number of Key cards as well as video footage from inside EI HQ.

A number of High Ranking officials were seen leaving the SF police station and the TST base on Tuesday 20th August for what we believe to have been interrogations. The press report reveals that there is no physical evidence linking any GT employees to the evidence collected however SA court fined Global Trust \$300000000 for industrial espionage, the largest fine ever handed out by a court in San Andreas.

This news come out just 1 week after the rumours about secret government funding for GT and these combined could result in a dramatic fall in share prices despite the recent merger with UTC.

The scandal was focused around the neighbouring office buildings of the two companies in San Fierro

THE REVOLUTION ARRIVES : JUGGERNAUT

Desert Eagles Special Forces, introduces the world-class Juggernaut. This beastly god-fucker can tear apart even the mightiest of machines and warforms, but it has its own limitations. You need to know though, the metaphorical and literal meaning of the word "Juggernaut" is 'mercilessly destructive' or just 'unstoppable'.

The Juggernaut is a buffed armor-like suit, with several devices onto it. It has a godly mini-gun to operate, which takes up to 75% more damage than that which Cuban mini-guns would make. It is operated by men of the DE, that have been specially trained to tolerate hell-loads of damage. To kill this fatso, you have to penetrate the hell-thick armor, and then try to kill an elephant of a man, that can bear twice than that a normal man would. This is an utter and complete monster, and none of us is sure which battlefield it's gonna land on.

Don't judge soon enough though, pals, it isn't so bad. This monster can only walk, well, who'd run with that load on their backs? It cannot swim, I think you already saw that coming. It can only drive barracks or tanks; my opinion is based on that because such a fatty will not really fit into anything else, and it's minigun shoots 50% slower.

We've already seen what this beast is, now let's see various peoples' responses towards it.

CLO's Colonel, Tombaa, says: "The juggernaut idea is silly, if its added then we'll use our aks and our fight to kill it nothing else, we don't need special shit."

A known leader of the underground gay society SAES, Mr. Benn, says: "I think that DE have gone too far! This 'Juggernaut' is an unfair addition, the kind of feature we have been trying to stamp out and I don't welcome it! Long live fairness to all!"

Yoshixd, the voice of the women, says: "The Juggernaut skin is honestly a waste of resources. For those who complain that DE doesn't invest in development enough, I do believe they had a base renovation 1 1/2 - 2 months ago. Stop the bitching. The juggernaut isn't necessary. We spoke about fairness between gangs. Do the same with Fairness between groups."

Kasimir, another leader of the gay society, says: "Its gay, even gayer than Benn"

Summer up, community is against it. What do you have to say?

SAPD ANNOUNCES **MOST WANTED**

Following earlier reports of insufficiency of police forces and resources, San Andreas Police Department has announced that it is unable to keep up with the crime rate, and has called for help from citizens. The P.A.T.R.I.O.T. act signed by the government will allow regular citizens to disable / kill most wanted criminals without facing charges.

Just like how it used to be in the old west, citizens who turn in criminals will be awarded with a sum of money.

Number of vigilantes is expected to rise as the police department has announced the high bounties. However, arresting these criminals may not be that easy - the Police Department has warned civilians to not try to chase these criminals if they see them. The criminals are known to be murderers with no mercy at all.

SF CATHEDRAL BURNED DOWN

At the same time as the arson at the burger shot on Saturday morning, our news-crews were filming a fire at the San Fierro cathedral in downtown.

A arsonist from a satanist group broke into the cathedral at 1:20am and started to burn all he pleased. He managed to burn most of the interior, causing a damage total of \$120000 to the cathedral.

He was surrounded by 3 police cars, with 3 officers pointing guns at him, as he decided to go outside and burn the grass around the cathedral as well. He surrendered to the officers and was taken into custody as fire crews arrived on the scene to get the fire under control.

The fire crews fought until 4AM to put out the fire, but luckily it didn't cause much damage to the exterior meaning that the church would be

safe to repair and use in the future. The church is currently undergoing repairs and ZIP say it will be ready by the end of the month it will be ready to hold prayers.

The church was struck only a month ago by the Al-Saield terrorist group and the repairs were finished last week. The government has now employed armed guards to patrol the area of the church and police/SWAT are keeping their eye over the area.

The arsonist was taken to San Fierro Police Department where he spent the night, and was taken to the Los Santos County Court the following day. He admitted to burning the church and was sentenced to 40 months in the San Andreas Mental Institute. He was then taken away by the guards.

BURGER SHOT

1:30AM

MARINA BURGER SHOT **ROBBED&BURNT**

The burger shot in Marina, LS has been burnt down following a brutal robbery and murder. On Saturday, Burger Shot was just about to close in the evening when a CCTV camera caught two people entering the building. One of them approached the counter and the other one started wandering around.

Just a while later, the other approached the counter too, but this wasn't just a late night meal, it was much worse. The men pulled out Uzis, and before the woman working at the counter, whose identity hasn't been revealed yet, could scream, they shot her down in cold blood.

The armed robbers robbed the cash register and left the building, throwing a Molotov behind the counter and resulting in a fire that became bigger because of all the explosives &

flammables in the Burger Shot, used to heat up the equipment.

Posted Image

The identity and the whereabouts of these murderous arsonist robbers is still unknown. Los Santos Police Department has published news broadcasts requesting citizens to call 911 right ahead if they see anyone matching the description. The FBI is offering a reward of \$100k for any information leading to the capture and arrest of these 2 men.

For now the area remains closed as forensic teams are scrutinizing what's left of the burger shot to find more evidence about the identities of these two men.

Criminals have been known to burn cars after they stole them to hide evidence, but recently the burning of buildings after robberies have also been common too with criminals

SAVE THE EARTH

ZIP WORKERS **STUCK ON A TREE**

On Friday last week 2 workers from the company ZIP were hired by a 'false' company and were scammed into building a tree house.

They then lost there rope to get back down and were stuck, they called 911.

The first on the scene was Deputy Johnson with his rescue vehicle, SAFD were short after with there ladder truck.

The generator on the tree house blew up causing a huge fire with lots of smoke, the SAFD tried to get up there using the ladder truck.

How ever the red wood was too tall for the ladder truck! So SAFD called in a rescue helicopter to air lift them to East LS General hospital.

The men were later questioned by SAI and the police discovered that they had been scammed by a so called 'Forest Guard' company, Police are looking for any more information about this scamming prankster group.

QUEENS GETS A NEW **SEX STORE**

Ever wanted to visit a sex store but there wasn't one in town? Wanted to buy toys because fingering yourself isn't that much fun anymore? Well, lucky if you are living around Queens, San Fierro, because the known Sex Stores chain opened a franchise there! The shop was opened by the Mayor of San Fierro and will be serving with discounts for its first month.

The prices in the sex shop are fairly low, affordable for both the middle class and the homeless. A dildo can be bought for 5\$, says the cashier. Even some gays are coming to buy some and stick them up their asses, he adds.

The Sex Store has raised some concern among the townsfolk. The residents of the area say the area is an expensive, elite region and not a ghetto. A sex shop is reducing the value of our houses and businesses, residents say. Plus, it's no longer safe for their kids to go out to the streets since the sex store is doing public porn displays for the homeless as well.

The SANA team interviewed one of the residents of the building right next to the store. The interview can be found on the right.

Mr. Blueberry: Good afternoon, sir

Interviewee: Hello Mr. Blueberry. It's a pleasure to meet you, I'm always reading your articles in the newspapers.

Mr. Blueberry: Thank you, its a pleasure to meet you too. May i note your name, sir?

Interviewee: Sure, Its Marien Den

Mr. Blueberry: Well, Mr. Den, what do you think about the new sex store in your neighborhood?

Interviewee: I think its a bit mis-placed as this is not really the neighborhood for those stuff. I live in a classy average neighborhood and not in a ghetto.

Mr. Blueberry: I understand, sir.

Interviewee: Though its nice to have one near.

Mr. Blueberry: What does your wife think about the store?

Interviewee: My wife was shocked by it. First a gaybar and then a sex store, the neighborhood is getting less classy in her opinion.

Mr. Blueberry: That's the end of my questions, thank you for the interview!

The future re

ests in the skies.

SAPD ADMINISTRATION?

WHAT'S THAT?

Since about a month or so, the SAPD has been running without clear administration. Police Agencies like SWAT, FBI, EPiX, MI-6, SAPA and others, and their administrative staff have turned a blind eye towards SAPD and its prestigious division; ProCops. Whilst trainees are being suspended and even fired daily, a very less amount of police officers have been showing the same dedication and effort which they used to in the past. Crime rate has not decreased, yet, Police activity has. Will we be seeing such nonadministrative procedures being carried out? The democracy hopes not.

Saturday, 18th of August, iStar, ex-SAPA's vice, and SniperX, commander of the Strike Force, planned to take on the role of an acting commander to get the PD in shape. The democracy denied them the privilege and warned the police groups to appoint their HQ's to be operators and district crime minimizers. While the police agencies are busy sorting out internal problems, this could be a very easy month for criminals. We may see a drastic increase in crime rate; murders, extortion, kidnapping, mental torture, what not. SANA's message to the general public, is to get to the nearest AmmuNation if you have a license, grab a weapon and keep your family safe!

Can we continue to rely on the state's police? What has the senate planned? Will there be no action taken? We will find out!

El Paso County Sheriff's Office
